**Science Advisory Board; Notification
of Public Advisory Committee
Meetings**

Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that two committees of the US Environmental Protection Agency's (EPA) Science Advisory Board (SAB) will meet on the dates and times described below. All times noted are Eastern Time. All meetings are open to the public. Due to limited space, seating at all meetings will be on a first-come basis. For further information concerning each meeting, please contact the individuals listed below. Documents that are the subject of SAB reviews are normally available from the originating EPA office and are not available from the SAB Office. Information concerning document availability from the relevant EPA Program area is included below.

1. Clean Air Scientific Advisory Committee

The Clean Air Scientific Advisory Committee (CASAC) of the Science Advisory Board (SAB) will meet on Tuesday and Wednesday, September 19-20, 1995 at the Brownstone Hotel, 1707 Hillsborough Street, Raleigh, NC 27605 (phone: 919/828-0811). The meeting will begin at 8:30 am and end at 5 pm each day.

Purpose of the Meeting—At this meeting, the Committee will review and provide advice to EPA on the August 1995 external review draft staff paper for ozone (Review of National Ambient Air Quality Standards for Ozone: Assessment of Scientific and Technical Information), and its associated analyses. The purpose of the staff paper is to evaluate and interpret the most relevant scientific and technical information reviewed in the ozone air quality criteria document in order to better specify the critical elements which the EPA staff believes should be considered in any possible revisions to the national ambient air quality standards (NAAQS) for ozone. This document is intended to bridge the gap between the scientific review contained in the criteria document and the judgments required of the Administrator in setting NAAQS for ozone. The Committee will consider presentations from Agency staff and the interested public prior to making recommendations to the Administrator.

The Committee will also complete its review of the final changes made to the criteria document (Air Quality Criteria for Ozone and Related Photochemical Oxidants) on the basis of comments received on the February 1995 CASAC Review Draft at the previous public meeting held March 21-22, 1995 (see 60 FR 11971-11974, dated March 3, 1995).

Availability of Documents—Documents that are the subject of Science Advisory Board reviews are *not* available from the SAB. They must be obtained from the appropriate EPA office listed below.

(a) *Draft Ozone Criteria Document*—Limited copies of the final revisions will be available at the meeting.

(b) *Draft Ozone Staff Paper*—Single copies of the ozone staff paper may be obtained from Dr. David J. McKee, Office of Air Quality Planning and Standards (MD-15), U.S. EPA, Research Triangle Park, NC 27711. Dr. McKee can also be reached by telephone at (919) 541-5288 or by fax at (919) 541-0237. The Office of Air Quality Planning and Standards (OAQPS) will accept written comments from the public on all aspects of their revised external review draft staff paper for ozone and revised technical support documents through October 16, 1995. Comments should be sent to Dr. McKee at the previously stated address.

For Further Information—Members of the public desiring additional information concerning the meeting should contact Mr. A. Robert Flaak, Acting Designated Federal Official, Clean Air Scientific Advisory Committee, Science Advisory Board (1400F), US Environmental Protection Agency, Washington, DC 20460, telephone (202) 260-5133, fax (202) 260-7118 or via the INTERNET at FLAAK.ROBERT@EPAMAIL.EPA.GOV. A brief time period will be allocated for presentations on both days; however, public commentators will be limited to five minutes per person or organization [It is expected that oral comments will be heard regarding the primary standard on September 19th and on the secondary standard on September 20th]. The written request should identify the name of the individual who will make the presentation, the organization (if any) they will represent, any audio visual requirements (e.g., overhead projector, 35mm projector, chalkboard, etc), and which issue (primary or secondary standard) they will address. Presentors are expected to provide at least 35 copies of an outline of the issues to be addressed or the presentation itself.

Science Advisory Board; Notification of Public Advisory Committee Meeting; Meeting Cancellation

Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the previously announced meeting of the Ecological Processes and Effects Committee of the Science Advisory Board, scheduled for September 7-8, 1995, at the Environmental Protection Agency's Washington Information Center, Conference Room 17, 401 M Street, SW., Washington, DC 20460, has been cancelled (60 FR 43594-43595; August 22, 1995). A principal reason for the meeting was to review portions of the Agency's draft document, "Proposed Environmental Goals for America with Benchmarks for the Year 2005." That document is not yet available for review by the SAB, due to additional internal reviews scheduled by the Agency.

Background: The Environmental Goals Project is an EPA effort to define national environmental goals and benchmarks by which to measure progress toward achieving those goals. In 1994, a series of nine public roundtables were held in cities around the country to receive input on the nation's goals for the environment. The draft document, "Proposed Environmental Goals for America with Benchmarks for the Year 2005," summarizes the Agency's proposals for long-range goals and measurable 10-year benchmarks. Following review by other federal agencies and the SAB, the document will be distributed for public review, including a series of public roundtables in early 1996. Concurrent with final federal agency review of the document, the SAB has been asked to review the goals and benchmarks and evaluate the following: (a) Are the long-range goals technically meaningful and achievable? (b) will the goals, if met, result in a healthy and economically secure populace and a healthy environment? (c) are the milestones appropriate for gauging progress toward the goals? (d) do the milestones, taken together, adequately cover the range of technical considerations for each goal? and, (e) what other milestones should be
